About Me

Frontend Developer specialized in Web3 and blockchain since 2019. Building modern, performant, and user-centric DeFi applications with React, Next.js, and TypeScript. Experienced in all stages of frontend development from smart contract integrations to responsive UI design, deployment processes to performance optimization. Successfully collaborated with international clients on remote projects.

Technical Skills

Frontend: HTML5, CSS3, React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Three.js
Web3 & Blockchain: Ethers.js, Web3.js, WalletConnect, Smart Contract Integration, ERC-20, BRC-20, DeFi Protocols
Backend & Tools: PostgreSQL, Supabase, Prisma ORM, REST API, Git, Figma, Vercel
Specializations: UI/UX Design, SEO Optimization, Performance Optimization

Languages

Turkish: Native
English: B1 Level

Experience

- **Frontend Developer - Web3 Focus** — *2024 - Present*
  International Freelance — Remote
  - Developed DApps, presale platforms, and token sale systems using TypeScript/Next.js
  - Built real-time trading bots, price trackers, and on-chain monitoring tools with REST API and WebSocket
  - Implemented smart contract integrations for staking, liquidity pools, and yield farming dashboards
  - Created interactive landing pages with Three.js and managed full project lifecycle from design to deployment

- **Lead Frontend Developer & Designer** — *2023 - 2024*
  BRC-20 DeFi Platform — Satori Labs
  - Built comprehensive DeFi platform for Bitcoin ecosystem featuring staking, farming, bridge, and launchpad
  - Developed entire frontend (Next.js/React/TypeScript) including landing pages, dashboards, and DeFi interfaces
  - Implemented BRC-20 and ERC-20 token integrations with multi-chain wallet connections
  - Created staking dashboard with 4 lock periods, APY calculations, and tier-based launchpad with anti-bot protection
  - Designed all UI/UX, brand identity, and whitepaper layout using Figma/Adobe Creative Suite

- **Frontend Developer - Web3 & Blockchain** — *2021 - 2023*
  International Freelance — Remote
  - Developed DeFi and blockchain applications using React, Next.js, and TypeScript
  - Integrated smart contracts on Ethereum, BSC, and EVM-compatible networks (Ethers.js, Web3.js)
  - Built DEX interfaces, yield farming dashboards, and real-time trading tools with blockchain notifications

- **Frontend Developer** — *2019 - 2021*
  International Freelance — Remote
  - Developed responsive landing pages, dashboards, and web applications for international crypto and startup clients
  - Built performant web interfaces with HTML5, CSS3, JavaScript (ES6+) and created UI/UX designs using Figma/Adobe
